

Spencer Bristol Engineering was founded with a mission to bring an honest, uncomplicated approach to engineering. We'll bring to your next project a talented, experienced staff backed by state-of-the-art technologies, active principal involvement, and attentive client service from the first step until the last when construction has been completed and all systems are functioning as they should.

SBE is a full-service MEP engineering firm with the skills and resources to design and manage projects of any size and complexity ranging from small single-discipline jobs to demanding projects involving multiple buildings and disciplines.

The engineers at SBE offer a full complement of services including:

- Power Distribution Systems
- Heating, Ventilating and Air Conditioning (HVAC) Systems
- Lighting Systems
- Fire Protection and Life Safety Systems
- Security System Design
- Telecommunications System Design
- Arc Flash Studies
- Plumbing and Process Piping Systems

Principals

Morley Spencer began his engineering career at the respected English firm Drake & Scull Engineering, Ltd. before moving to the United States in 1973 where he continued his career in progressively more senior roles including a partnership in a Macon, GA firm, followed by Engineering Vice President of a large, multi-discipline international firm in Atlanta.

His experience includes the design of HVAC systems, process piping and fire protection systems for projects ranging from small renovations to multi-million dollar commercial projects including international projects in Panama, Mexico, and other locations. Morley's particular expertise is complex renovation projects.

Doug Bristol's career has taken him from an executive position with an large international engineering firm, to a telecommunications company, to his current position as Principal of SBE.

He has been designing electrical power, lighting, and special systems for more than 20 years in a diverse range of fields including aviation, higher education, commercial, institutional, and healthcare.

Doug's experience with system types includes energy plant power distribution, telecommunications, backup generation, UPS systems, Life safety, lighting design, and energy management.
